

Spring 2018 Calendar of Events

Computer Science Connections

Meeting Date	What We're Doing
Friday, 1/19/18	Intro to Semester Meeting & HackMT Prep
Friday, 1/26/18	No meeting -- HackMT
Friday, 2/2/18	<p>Designing your Portfolio Website</p> <p>Ever tried to write a resume? Realized how difficult it is to talk in detail about all the cool stuff you're doing? A portfolio website is a great way for a computer science student to showcase their skills and projects, allowing potential employers to see an overview of students' work or the source code if they choose. Come find out how to make one for free, using only your student Ranger account, Bootstrap, and some basic HTML knowledge.</p>
Friday, 2/9/18	<p>Open Code</p> <p>Open Code days are opportunities for students to come tackle coding challenge problems in a group. As in Code Contests, participants will solve problems of varying difficulty, but unlike in Code Contests, there will be no set time limit, and students work with each other instead of competing against each other. Use these meetings to prep for Code Contests, to hone your coding skills, or just to have fun!</p>
Friday, 2/16/18	<p>Code Contest</p> <p>CSC Code Contests, are low-key, for-practice-or-for-fun challenges in which participants compete with each other to solve a series of coding problems of varying difficulty. Go solo or join a team, and code in your choice of C++, Python, Haskell, Java and more. Be sure to register by the Wednesday before each contest through the CSC website.</p>
Friday, 2/23/18	<p>Resume Workshop</p> <p>Hosted by the MTSU Career Center. Make sure your resume screams "I'm your best bet!" to every job and internship application reviewer.</p>
Friday, 3/2/18	<p>Escape Room!</p> <p>Register in advance to join CSC in an Escape Game the last Friday before Spring Break!</p>
Friday, 3/9/18	No Meeting – Spring Break
Friday, 3/16/18	<p>D3 Workshop</p> <p>Learn the JavaScript library Data-Driven Documents (D3)! This library makes it easy to represent data in a visually interesting and readable way. Led by Elizabeth Rouze.</p>
Friday, 3/23/18	<p>Open Code</p>
Friday, 3/30/18	<p>ASP.NET MVC Workshop</p> <p>Interested in web development? Then come learn .NET MVC with CSC! The .NET Framework and the MVC design pattern help developers create powerful and organized web applications. .NET MVC has become a standard in many Microsoft-based web development companies. Join CSC in this workshop to learn the basics!</p>
Friday, 4/6/18	<p>Open Code</p>
Friday, 4/13/18	<p>Code Contest</p>
Friday, 4/20/18	<p>Software Structure and Design Workshop</p> <p>Full-stack developer Michael Smith joins us to talk about a clean approach to software development and the importance of strong software architecture in the field.</p>
Friday, 4/27/18	No Meeting – Finals Begin
